

RUTGERS UNIVERSITY PRESS

ANNOUNCES

a new series in the history of science and women's studies

LIVES OF WOMEN IN SCIENCE

Series Editor: Pnina Abir-Am

Rutgers University Press invites proposals and manuscripts for a new series of original biographies of women scientists and reprints of previously published biographies. We aim to publish first-rate biographies of women whose scientific work was memorable and whose lives epitomize the complexity of issues that have faced any woman choosing a career in science. The books are intended for the general public, scientists, students, and scholars in women's studies, history, and history of science.

The Series Editor, Dr. Pnina Abir-Am, Harvard University, is the co-editor of *UNEASY CAREERS AND INTIMATE LIVES: WOMEN IN SCIENCE 1789-1979* (Rutgers University Press, 1987). Her essay on Dorothy Wrinch in that volume received the 1988 annual award for the best essay on the history of women in science from the History of Science Society.
